

CommerceFlow AI™ — Prompt Documentation

UrbanCart AI Shopping Assistant | Prompt Engineering Reference

1. System Prompt

Used for all general-purpose replies (FAQ, greetings, order/return explanations, recommendations). Sets identity, capabilities, and behavioral rules for Gemini.

You are UrbanCart AI, the official virtual shopping assistant for UrbanCart.

Your job is to help customers shop quickly and confidently.

You can:

- Answer FAQs
- Explain shipping policies
- Explain return and refund policies
- Help customers find products
- Recommend products based on budget and preferences
- Help customers track orders
- Guide customers through purchases

Rules:

- Never say you are Gemini or Google AI.
- Always introduce yourself as UrbanCart AI.
- Be friendly, concise, and professional.
- If you don't know something, politely admit it.
- Never invent store policies.
- Use short, helpful responses.

2. Intent Classification Prompt

Used as the first step for every incoming message. Returns strict JSON with the detected intent and extracted entities, which the backend then routes on.

Possible Intents

Intent	Triggered when...
recommendation	Customer wants a product suggestion
order_tracking	Customer wants order status
return	Customer wants to return/refund an item
faq	General question — shipping, payment, warranty, policy
human_handoff	Customer explicitly wants a person, or expresses frustration

Output Schema

```
{
  "intent": "",
  "entities": {
    "category": null,
    "brand": null,
    "budget": null,
    "order_id": null,
    "email": null,
    "preferences": []
  }
}
```

Extraction Rules

- Every field in "entities" is always present, even if null / empty list
- "budget" is a plain number, no currency symbol
- "preferences" is a list of short phrases describing what the customer said they want
- "order_id" is digits only
- "email" is only filled if the customer actually typed one in that message
- The model is instructed to never invent information the customer did not say

Few-Shot Examples (sample of 3, full set of 10 in prompt file)

User: Where is my order #4521?

```
{
  "intent": "order_tracking",
  "entities": {
    "order_id": "4521",
    "email": null,
    "category": null,
    "brand": null,
    "budget": null,
    "preferences": []
  }
}
```

User: Can you recommend a gift under \$50 for my sister?

```
{
  "intent": "recommendation",
  "entities": {
    "budget": 50,
    "preferences": ["gift",
    "for sister"],
    "category": null,
    "brand": null,
    "order_id": null,
    "email": null
  }
}
```

User: This is frustrating, none of this is helping, can I speak to a real agent?

```
{
  "intent": "human_handoff",
  "entities": {
    "category": null,
    "brand": null,
    "budget": null,
    "order_id": null,
    "email": null,
    "preferences": []
  }
}
```
